

Interim Template for Country Workplans, 2008-2009

Strategic Objective 1: To reduce the health, social and economic burden of communicable diseases

Organization-wide Expected Result	Planning Element
1. Policy and technical support provided to Member States in order to maximize equitable access of all people to vaccines of assured quality, including new immunization products and technologies, and to integrate other essential child-health interventions with immunization.	1. Policy, technical and resource support provided for development of national policy to ensures equitable access to secure supply of vaccines of assured quality, including new vaccines and technologies, and to integrate other essential child-health interventions with immunization.
	OSER1 Support provided to the MoPH to strengthen national immunization programme
	P1 Support provided to the MoPH to strengthen national immunization programme
	2. High quality supplemental immunization activities integrated with selected maternal and child intervention, and outbreak responses (except polio) provided.
	3. Policy and technical support for monitoring and evaluation of the Immunization programme strengthened.
	OSER1 Monitoring and evaluation of the immunization programme reviewed and strengthened.
2. Effective coordination and support provided in order to achieve certification of poliomyelitis eradication, and destruction, or appropriate containment, of polioviruses, leading to a simultaneous cessation of oral poliomyelitis vaccination globally.	1. Indigenous poliovirus transmission interrupted, certification process on track, polio virus stocks contained, guidelines for OPV cessation developed, and polio infrastructure transition to support other VPD surveillance and control initiated.
	OSER1 Support provided to the MoPH for increasing polio immunization coverage in certain localities
	P1 Providing support to strengthen the national immunization programme on polio vaccination in migrant population
3. Effective coordination and support provided to Member States in order to provide access for all populations to interventions for the prevention, control, elimination and eradication of neglected tropical diseases, including zoonotic diseases	1. Expansion and scale-up of interventions for prevention, control, elimination & eradication of neglected tropical diseases such as Leprosy, LF, Kala Azar and Yaws supported and coordinated.
	2. Collaboration between public health and animal health sectors further strengthened for prevention and control of avian influenza and zoonotic diseases of national importance.
	OSER1 Collaboration mechanisms strengthened between public health and animal sectors to promote prevention and control of avian influenza and zoonotic diseases of natinal importance
	P1 Collaboration mechanisms between public health and animal sectors to promote prevention and control of avian influenza and zoonotic diseases of natinal importance

Interim Template for Country Workplans, 2008-2009

Organization-wide Expected Result	Planning Element	
	OSER2	The potential transmission of the AI virus is reduced through public health interventions
	P.1	Pilot projects to reduce the potential transmission of viruses from animals to human are implemented and evaluated
4. Policy and technical support provided to Member States in order to enhance their capacity to carry out surveillance and monitoring of all communicable diseases of public health importance.	1. Surveillance and response to communicable diseases, including monitoring and evaluation, strengthened.	
	OSER1	Support provided to relevant partners in enhancing personnel capacity in surveillance and responses to communicable diseases of public health importance
	P1	Enhanced capacity of personnel in-charge-of surveillance and responses to communicable diseases of public health importance
	2. Tools to improve prevention, control and management of communicable diseases developed and updated.	
	OSER1	Support provided to relevant partners in developing and updating tools to improve prevention, control and management of communicable diseases
	P1	Tools improved for prevention, control and management of communicable diseases
	3. Networking of Public Health Laboratories established/strengthened in communicable diseases.	
	OSER1	Support provided to relevant partners to strengthen networks of public health laboratories in communicable diseases
	P1	Strengthened network of public health laboratories in communicable diseases
	4. Availability of reliable data on incidence of VPD through disease burden analysis and timely surveillance systems supported by standardized laboratory networks.	
	OSER1	Support provided to relevant partners to develop and maintain reliable data on incidence of VPD or other communicable diseases of public health importance available through burden analysis and timely surveillance systems supported by standardized laboratory networks
	P1	Reliable data on incidence of VPD
5. New knowledge, intervention tools and strategies that meet priority needs for the prevention and control of communicable diseases developed and validated, with scientists from developing countries increasingly taking the lead in this research.	1. Research in communicable diseases, including TDR, strengthened.	
	OSER1	Support provided to relevant partners to conduct research in communicable diseases
	P1	Research supported on communicable diseases of public health importance

Interim Template for Country Workplans, 2008-2009

Organization-wide Expected Result	Planning Element						
	<p>2. Research supported, guidance provided, partnerships built, and research and development capacity in the Region strengthened, for the development of locally-relevant vaccines.</p> <table border="1"> <tr> <td>OSER1</td> <td>Support provided to relevant partners in capacity building for developing of local relevant vaccine</td> </tr> <tr> <td>P1</td> <td>Increased country's capacity in vaccine development</td> </tr> </table>	OSER1	Support provided to relevant partners in capacity building for developing of local relevant vaccine	P1	Increased country's capacity in vaccine development		
OSER1	Support provided to relevant partners in capacity building for developing of local relevant vaccine						
P1	Increased country's capacity in vaccine development						
6. Support provided to Member States in order to achieve the minimum core capacities required by the International Health Regulations (2005) for the establishment and strengthening of alert and response systems for use in epidemics and other public health emergencies of international concern.	<p>1. Assessment and national core capacity requirements under IHR 2005 strengthened</p> <table border="1"> <tr> <td>OSER1</td> <td>Support provided to relevant partners to assess and improve national core capacities required under IHR 2005</td> </tr> <tr> <td>P1</td> <td>Country's core capacity to meet IHR requirements</td> </tr> </table> <p>2. Intercountry collaboration of IHR established</p> <table border="1"> <tr> <td>OSER1</td> <td>Support provided to the MoPH to implement intercountry collaboration on IHR</td> </tr> </table>	OSER1	Support provided to relevant partners to assess and improve national core capacities required under IHR 2005	P1	Country's core capacity to meet IHR requirements	OSER1	Support provided to the MoPH to implement intercountry collaboration on IHR
OSER1	Support provided to relevant partners to assess and improve national core capacities required under IHR 2005						
P1	Country's core capacity to meet IHR requirements						
OSER1	Support provided to the MoPH to implement intercountry collaboration on IHR						
7. Member States and the international community equipped to detect, assess, respond to and cope with major epidemic and pandemic-prone diseases (e.g. influenza, meningitis, yellow fever, haemorrhagic fevers, plague and smallpox) through the development and implementation of tools, methodologies, practices, networks and partnerships for prevention, detection, preparedness and intervention.	<p>1. Planning and preparedness for major epidemics and pandemics strengthened.</p> <table border="1"> <tr> <td>OSER1</td> <td>Support provided to relevant partners to strengthen planning and preparedness for major epidemics and pandemics</td> </tr> </table> <p>2. Response capacity against major epidemics and pandemics augmented.</p> <table border="1"> <tr> <td>OSER1</td> <td>Enhanced capacities of key partners in response to major epidemics and pandemics</td> </tr> <tr> <td>P1</td> <td>Enhanced capacities of health personnel in surveillance situation analysis and field epidemiological investigation</td> </tr> </table>	OSER1	Support provided to relevant partners to strengthen planning and preparedness for major epidemics and pandemics	OSER1	Enhanced capacities of key partners in response to major epidemics and pandemics	P1	Enhanced capacities of health personnel in surveillance situation analysis and field epidemiological investigation
OSER1	Support provided to relevant partners to strengthen planning and preparedness for major epidemics and pandemics						
OSER1	Enhanced capacities of key partners in response to major epidemics and pandemics						
P1	Enhanced capacities of health personnel in surveillance situation analysis and field epidemiological investigation						
8. Regional and global capacity coordinated and made rapidly available to Member States for detection, verification, risk assessment and response to epidemics and other public health emergencies of international concern.	<p>1. Strengthened communications to enhance capabilities of country CSR and IHR focal point.</p> <table border="1"> <tr> <td>OSER1</td> <td>Support provided to relevant partners to strengthen communications to enhance capacities of their CSR and IHR focal points</td> </tr> <tr> <td>P1</td> <td>Strengthened communications to enhance capacities of their CSR and IHR focal points</td> </tr> </table> <p>2. Regionalization of GOARN achieved and roster of Regional/National RRT and experts established</p>	OSER1	Support provided to relevant partners to strengthen communications to enhance capacities of their CSR and IHR focal points	P1	Strengthened communications to enhance capacities of their CSR and IHR focal points		
OSER1	Support provided to relevant partners to strengthen communications to enhance capacities of their CSR and IHR focal points						
P1	Strengthened communications to enhance capacities of their CSR and IHR focal points
