

Interim Template for Country Workplans, 2008-2009

Strategic Objective 2: To combat HIV/AIDS, tuberculosis and malaria

Country: Thailand

Organization-wide Expected Result	Planning Element (RER>OSER>P>A)
1. Guidelines, policy, strategy and other tools developed for prevention of, and treatment and care for patients with, HIV/AIDS, tuberculosis and malaria, including innovative approaches for increasing coverage of the interventions among poor people, and hard-to-reach and vulnerable populations.	1. Region-specific and evidence-based guidelines, policies, strategies and other tools developed for strengthening the health care system across HIV/STI, TB and malaria
	OSER1 <i>Support provided to relevant partners to develop guidelines, policies, strategies and other tools for strengthening the health care system across HIV/STI, TB, and malaria</i>
	P1 <i>Guidelines developed for strengthening the health care system across HIV/STI, TB, and malaria programmes</i>
2. Policy and technical support provided to countries towards expanded gender-sensitive delivery of prevention, treatment and care interventions for HIV/AIDS, tuberculosis and malaria, including integrated training and service delivery; wider service-provider networks; and strengthened laboratory capacities and better linkages with other health services, such as those for reproductive health, maternal, newborn and child health, sexually transmitted infections, nutrition, drug-dependence treatment services, respiratory care, neglected diseases and environmental health.	1. Delivery of prevention, treatment and care services for HIV/STI, TB and malaria expanded and decentralized with strengthened laboratory support.
	OSER1 <i>Support provided to relevant partners to expand and decentralize delivery of prevention, treatment and care services for HIV/STIs and TB including strengthening laboratory support</i>
	P1 <i>Models developed for expansion and decentralization of delivery of prevention, treatment and care services for HIV/STIs and TB</i>
	2. Collaborative cross-border interventions strengthened.
	OSER1 <i>Support provided to relevant partners on collaborative cross-border interventions across HIV/STI, TB and malaria</i>
	P1 <i>Collaboration among stakeholders working on cross-border interventions across HIV/STIs, TB and malaria</i>
3. Global guidance and technical support provided on policies and programmes in order to promote equitable access to essential medicines, diagnostic tools and health technologies of assured quality for the prevention and treatment of HIV/AIDS, tuberculosis and malaria, and their rational use by prescribers and consumers, and, in order to ensure uninterrupted supplies of diagnostics, safe blood and blood products, injections and other essential health technologies and commodities.	1. Equitable access to essential medicines and rational use of quality drugs, diagnostics and commodities for HIV/STI, TB and malaria programmes strengthened.
	OSER1 <i>Support provided to relevant partners to provide equitable access to essential medicines and rational use of quality drugs, diagnostics and commodities for TB and malaria programmes</i>
	P1 <i>Improved access to quality drugs and diagnostics for TB and malaria</i>
4. Global, regional and national systems for surveillance, evaluation and monitoring strengthened and expanded to keep track of progress towards targets and allocation of resources for HIV/AIDS, tuberculosis and malaria control and to determine the impact of control efforts and the evolution of drug resistance.	1. Surveillance and monitoring of programme performance strengthened and impact of interventions on the burden and trends of HIV/AIDS, STIs, TB and malaria, including drug resistance, effectively assessed.
	OSER1 <i>Technical support provided to relevant partners on surveillance and monitoring of programme performance and impact of interventions on the burden and trends of HIV/AIDS, STIs, TB, and malaria programmes</i>

P1	<i>Improved surveillance and monitoring and evaluation systems of malaria and TB programmes</i>		
5. Political commitment sustained and mobilization of resources ensured through advocacy and nurturing of partnerships on HIV/AIDS, tuberculosis and malaria at country, regional and global levels; support provided to countries as appropriate to develop or strengthen and implement mechanisms for resource mobilization and utilization and increase the absorption capacity of available resources; and engagement of communities and affected persons increased to maximize the reach and performance of HIV/AIDS, tuberculosis and malaria control programmes.	1. Political commitment sustained and adequate resources mobilized for HIV/STIs, TB and malaria programmes.

	P1	Support provided to relevant partners to enhance sustainability and adequacy of resources for these diseases	
2. Engagement of communities and affected persons strengthened in the planning and implementation of HIV/STIs, TB and malaria prevention, care and treatment.			
<table border="1"> <tr> <td style="text-align: center;">OSER1</td> <td><i>Support provided to relevant partners to engage/promote communities and affected persons in the planning and implementation of HIV/STIs, TB, and malaria prevention, care and treatment</i></td> </tr> </table>	OSER1	<i>Support provided to relevant partners to engage/promote communities and affected persons in the planning and implementation of HIV/STIs, TB, and malaria prevention, care and treatment</i>	
OSER1	<i>Support provided to relevant partners to engage/promote communities and affected persons in the planning and implementation of HIV/STIs, TB, and malaria prevention, care and treatment</i>		
6. New knowledge, intervention tools and strategies developed and validated to meet priority needs for the prevention and control of HIV/AIDS, tuberculosis and malaria, with scientists from developing countries increasingly taking the lead in this research.	1. Operational research aimed at evaluation of existing interventions undertaken and innovative approaches under programme conditions developed and further scaled up.		
	<table border="1"> <tr> <td style="text-align: center;">OSER1</td> <td><i>Support provided to relevant partners on evaluation of existing interventions and development as well as scaling up of innovative approaches under programme conditions</i></td> </tr> </table>	OSER1	<i>Support provided to relevant partners on evaluation of existing interventions and development as well as scaling up of innovative approaches under programme conditions</i>
