

**Interim Template for Country Workplans, 2008-2009**

**Strategic Objective 4: To reduce morbidity and mortality and improve health during key stages of life, including pregnancy, childbirth, the neonatal period, childhood and adolescence, and improve sexual and reproductive health and promote active and healthy ageing for all individuals.**

**Country: Thailand**

Organization-wide Expected Result	Planning Element (RER>OSER>P>A)
(1)	(2)
1. Support provided to Member States to formulate a comprehensive policy, plan and strategy for scaling up towards universal access to effective interventions in collaboration with other programmes, paying attention to reducing gender inequality and health inequities, providing a continuum of care throughout the life course, integrating service delivery across different levels of the health system and strengthening coordination with civil society and the private sector.	<b>1. Capacities of Member States strengthened and further improved in operationalization of policies/strategies to achieve universal access to maternal and newborn health (MNH) and other reproductive health (RH) services.</b>
	<b>OSER1</b> <i>Agencies with improved capacities to forego policies/strategies to achieve universal access to maternal and newborn health (MNH) and other reproductive health (RH) services by promoting effective interventions, including strengthening human resources and ensuring continuum of care, through partnership with civil society, the private sector and relevant sectors other than health.</i>
	<b>P1</b> <i>Improved perinatal and newborn death registration and access to maternal and newborn care in conflict areas.</i>
	<b>4. Environmental influences and their effects on the children's health and development identified, better characterized and assessed.</b>
3. Guidelines, approaches and tools for improving maternal care applied at the country level, including technical support provided to Member States for intensified action to ensure skilled care for every pregnant woman and every newborn, through childbirth and the postpartum and postnatal periods, particularly for poor and disadvantaged populations, with progress monitored.	<b>OSER1</b> <i>Assessment of social and physical environment that influence and affect children's health and development</i>
	<b>P1</b> <i>National Profile on Children's environmental Health developed, based on the Report of the situation of the the environment affecting children's health developemnt</i>
	<b>1. Norms, standards and guidelines for improving MNH care updated and improved through well designed programmes and access to and quality of MNH services.</b>
	<b>OSER1</b> <i>Norms, standards and guidelines updated for improving MNH care; designing programmes to improve access to and quality of MNH services; and strengthening management of MNH programme, including involvement of families/communities and addressing equity issues, in coordination and partnership with development partners.</i>
4. Guidelines, approaches and tools for improving neonatal survival and health applied at country level, with technical support provided to Member States for intensified action towards universal coverage, effective interventions and monitoring of progress.	<b>P1</b> <i>Improved access to quality MNH services and improved care at home and community level</i>
	<b>1. Technical support provided to Member states for improving capacities of health providers and communities for newborn care</b>
	<b>OSER1</b> <i>Concerned agencies supported technically to conduct capacity building of health providers and communities for newborn care</i>
	<b>P1</b> <i>Concerned agencies supported technically to conduct capacity building of health providers and communities for newborn care</i>
	<b>3. A Regional Course on Essential Newborn Care (ENC) developed and implemented in Member States.</b>
	<b>OSER1</b> <i>National staff trained and conduct Essential Newborn Care Course (ENCC).</i>

Interim Template for Country Workplans, 2008-2009

Organization-wide Expected Result	Planning Element (RER>OSER>P>A)	
	P1	<i>Trained national staff on ENCC</i>
5. Guidelines, approaches and tools for improving child health and development applied at the country level, with technical support provided to Member States for intensified action towards universal coverage of the population with effective interventions and for monitoring progress, taking into consideration international and human-rights norms and standards, notably those stipulated in the Convention on the Rights of the Child.	<b>1. A review of initiatives to ensure universal coverage with evidence based, effective child health interventions undertaken and provision of continuum of care for children at community level, first level health facilities and referral institutions ensured.</b>	
	OSER1	<i>Review of effective child care interventions, including referral systems and universal coverage</i>
	P1	<i>Guidelines for effective child health services</i>
6. Technical support provided to Member States for the implementation of evidence-based policies and strategies on adolescent health and development, and for the scaling up of a package of prevention, treatment and care interventions in accordance with established standards.	<b>1. National strategies developed for implementation and scale-up of evidence based interventions (AFHS) for adolescent health and development.</b>	
	OSER1	<i>Development of national strategies and support implementation and scale-up of evidence-based interventions (AFHS) for adolescent health and development.</i>
	P1	<i>Developed National Strategies on evidence-based interventions for adolescent health and development</i>
7. Guidelines, approaches and tools made available, with provision of technical support to Member States for accelerated action towards implementing the strategy to accelerate progress towards the attainment of international development goals and targets related to reproductive health, with particular emphasis on ensuring equitable access to good-quality sexual and reproductive health services, particularly in areas of unmet need, and with respect for human rights as they relate to sexual and reproductive health.	<b>1. Norms, standards and guidelines for improving key RH services regularly updated; programmes to improve access to and quality of RH services designed, with special attention to the poor and disadvantaged populations; and integration of key RH services with relevant programmes strengthened in coordination and partnership with development partners.</b>	
	OSER1	<i>Integrated, standard strategies and guidelines developed for maternal health care, RH and MPS and a standardized method for estimation of maternal mortality ratio established</i>
	P1	<i>Developed standard strategies and guidelines for maternal health care, RH and MPS and standard method for estimation of MMR</i>
8. Guidelines, approaches, tools, and technical assistance provided to Member States for increased advocacy for consideration of ageing as a public health issue, for the development and implementation of policies and programmes aiming at maintaining maximum functional capacity throughout the life course and for the training of health-care providers in approaches that ensure healthy ageing.	<b>1. Regional and country strategies on healthy ageing developed and advocated.</b>	
	OSER1	<i>National advocacy for Healthy Ageing strengthened</i>
	P1	<i>Improved national advocacy and capacity on healthy ageing</i>
