

Interim Template for Country Workplans, 2008-2009

Strategic Objective 5: To reduce the health consequences of emergencies, disasters, crises and conflicts, and minimize their social and economic impact

Country : Thailand

Organization-wide Expected Result	Planning Element (RER>OSER>P>A)
1. Norms and standards developed, capacity built and technical support provided to Member States for the development and strengthening of national emergency preparedness plans and programmes.	1. Benchmarks for emergency preparedness and response services in Member States comprehensively achieved.
	OSER1 <i>MOPH and other national partners supported on emergency preparedness and response in achieving benchmarks.</i>
	P1 <i>MOPH and other national partners supported to achieve the emergency preparedness and response (EPR) benchmarks.</i>
	2. Preparedness plans developed in public health areas (e.g., mental health and psychosocial aspects, injuries and trauma, nutrition, environmental health; reproductive health, gender, women and health).
	OSER1 <i>National partners supported in developing emergency preparedness plans in mental health and psychosocial aspects, injuries and trauma, nutrition, environmental health; reproductive health.</i>
	P1 <i>Emergency preparedness and response (EPR) plans developed on mental health and psychosocial aspects, injuries and trauma, nutrition, environmental health, reproductive health.</i>
2. Norms and standards developed, capacity built and technical support provided to Member States for a timely response to disasters associated with natural hazards and to conflict-related crises.	1. Guidelines for best public health practices in emergencies reviewed, updated, adopted and disseminated to countries with appropriate staff trained.
	OSER1 <i>Guidelines for best public health practices in emergencies adapted in the country-context and disseminated to all stakeholders and capacity of staffs enhanced mainly on nutrition, maternal health, newborn and child health, injuries including essential emergency surgical service and post injury rehabilitation; environmental health; and reproductive health including HIV/AIDS.</i>
	P1 <i>Guidelines for best public health practices in emergencies available in Thai context and disseminated to all stakeholders and capacity of staffs enhanced mainly on nutrition, maternal health, newborn and child health, injuries including essential emergency surgical service and post injury rehabilitation; environmental health; and reproductive health including HIV/AIDS.</i>
	2. Enhanced capacity of Member States to launch appropriate public health interventions (E.g. mental health and psychosocial relief efforts after disasters; nutrition, reproductive health and environmental health).
	OSER1 <i>Enhanced capacity to respond to health effects of emergencies in place.</i>
	P1 <i>Response operations implemented in emergencies.</i>
3. Norms and standards developed, capacity built and technical support provided to Member States for assessing needs and for planning and implementing interventions during the transition and recovery phases of conflicts and disasters.	1. Guidelines and benchmarks for recovery and transition using regional experience developed, adopted, disseminated and appropriate staff trained.
	OSER1 <i>Guidelines and benchmarks for recovery and transition (using Regional experience) adapted, disseminated to all stakeholders and appropriate staff trained.</i>
	P1 <i>Guidelines and benchmarks for recovery and transition (using Regional experience) adapted, disseminated to all stakeholders and appropriate staff trained.</i>
