

Interim Template for Country Workplans, 2008-2009

Strategic Objective 6: To promote health and development, and prevent or reduce risk factors for health conditions associated with use of tobacco, alcohol, drugs and other psychoactive substances, unhealthy diets, physical inactivity and unsafe sex

Country: Thailand

Organization-wide Expected Result	Planning Element (RER>OSER>P>A)				
1. Advice and support provided to Member States to build their capacity for health promotion across all relevant programmes, and to establish effective multisectoral and multidisciplinary collaborations for promoting health and preventing or reducing major risk factors.	1. Multisectoral health promotion practices and policy/plans developed in the Member States to reduce major risk factors.				
	<table border="1"> <tr> <td style="text-align: center;">OSER1</td> <td><i>Relevant agencies strengthened to become competent in health promotion and other aspects in reducing major risk factors.</i></td> </tr> <tr> <td style="text-align: center;">P1</td> <td><i>Relevant agencies strengthened to become competent in health promotion and other aspects in reducing major risk factors.</i></td> </tr> </table>	OSER1	<i>Relevant agencies strengthened to become competent in health promotion and other aspects in reducing major risk factors.</i>	P1	<i>Relevant agencies strengthened to become competent in health promotion and other aspects in reducing major risk factors.</i>
OSER1	<i>Relevant agencies strengthened to become competent in health promotion and other aspects in reducing major risk factors.</i>				
P1	<i>Relevant agencies strengthened to become competent in health promotion and other aspects in reducing major risk factors.</i>				
2. Guidance and support provided in order to strengthen national systems for surveillance of major risk factors through development and validation of frameworks, tools and operating procedures and their dissemination to Member States where a high or increasing burden of death and disability is attributable to these risk factors.	1. Surveillance and other information systems and tools for major risk factors developed and implemented in the Member States.				
	<table border="1"> <tr> <td style="text-align: center;">OSER1</td> <td><i>National agencies strengthened to develop surveillance and information systems and tools for major risk factors and to implement various surveys.</i></td> </tr> <tr> <td style="text-align: center;">P1</td> <td><i>Surveillance and information systems for major risk factors strengthened and/or developed by national agencies .</i></td> </tr> </table>	OSER1	<i>National agencies strengthened to develop surveillance and information systems and tools for major risk factors and to implement various surveys.</i>	P1	<i>Surveillance and information systems for major risk factors strengthened and/or developed by national agencies .</i>
OSER1	<i>National agencies strengthened to develop surveillance and information systems and tools for major risk factors and to implement various surveys.</i>				
P1	<i>Surveillance and information systems for major risk factors strengthened and/or developed by national agencies .</i>				
3. Evidence-based and ethical policies, strategies, recommendations, standards and guidelines developed, and technical support provided to Member States with a high or increasing burden of disease and death associated with tobacco use, enabling them to strengthen institutions in order to tackle or prevent the public health problems concerned; support also provided to the Conference of the Parties to the WHO Framework Convention on Tobacco Control for implementation of the provisions of the Convention and development and implementation of protocols and guidelines.	1. National institutions strengthened to enable them to develop policies, standards, guidelines and legislation by reflecting the provisions of the WHO FCTC. BGI funds				
	<table border="1"> <tr> <td style="text-align: center;">OSER1</td> <td><i>National tobacco control agencies strengthened to enable them to develop policies, standards, guidelines and legislation by reflecting the provisions of the WHO FCTC.</i></td> </tr> <tr> <td style="text-align: center;">P1</td> <td><i>National tobacco control agencies strengthened to enable them to develop policies, standards, guidelines and legislation by reflecting the provisions of the WHO FCTC.</i></td> </tr> </table>	OSER1	<i>National tobacco control agencies strengthened to enable them to develop policies, standards, guidelines and legislation by reflecting the provisions of the WHO FCTC.</i>	P1	<i>National tobacco control agencies strengthened to enable them to develop policies, standards, guidelines and legislation by reflecting the provisions of the WHO FCTC.</i>
